ABOUT US

History

AC Hydraulic A/S is a family owned company situated in Viborg, Denmark.

The company was established in 1958 by master smith Anker Christensen (AC). Shortly after launching his handicraft and repair shop Anker Christensen was inspired to design and develop high quality lorry and workshop cranes.

His original concept became the base of production and the AC crane was soon known in all of Denmark for its high quality.

Development of a wide range of lifting equipment soon took place and with the extended product range the company was ready to move into export.

Today AC Hydraulic A/S is a medium-sized, financially sound company exporting more than 80% of its production. The company is managed by the 3rd generation, sole owners, Søren and Claus Anker Christensen.

Production

Our products are “MADE IN DENMARK” in a modern high-tech production plant to a wide extent consisting of robots, laser cutting machines and state-of-the-art CNC machinery.

AC Hydraulic A/S employs 130 experienced and well-trained people that make it a point of honour to produce the best and most innovative quality products on the market.

We develop, produce and market our products in a modern 12,500 m² plant and we invest regularly in new machines and production methods.

Development

To be constantly at the leading edge of developments the AC product developers seek to improve the current product range as well as develop new products to meet market demands and needs.

We have therefore been able to build a strong market position and create a high level of customer satisfaction. AC has been successfully developed into a brand known for high quality and innovative solutions.
Quality
We make it a point of honour always to supply the best quality.
To ensure a constant high quality every product is being tested before shipment. This and many other points appear from our quality management system certified according to ISO 9001:2000.

Markets

Our distribution network consists of carefully chosen dealers and partners, all of them dedicated as well as highly professional.
